

Table of Contents

EXECUTIVE SUMMARY	1	Energy for Water Treatment and Distribution	28
INTRODUCTION	7	1. Water Treatment	30
ACKNOWLEDGMENTS.....	8	1.1 Water Treatment Standards	30
SECTION I. ENERGY FOR WATER	9	1.2 Treatment Plants.....	31
Introduction	9	i. Surface Water Treatment	31
Energy for Water Extraction.....	9	ii. Groundwater Treatment	31
1. Surface Water	10	iii. Trends.....	31
2. Groundwater.....	11	1.3 Energy Conservation.....	34
2.1 Groundwater Use in the U.S.	11	1.4 Green Infrastructure.....	35
2.2 Next Steps.....	13	2. Water Distribution	35
3. Desalination.....	13	2.1 Water Distribution Regulations.....	35
3.1 Desalination Technologies.....	14	2.2 Water Distribution Networks.....	36
i. Reverse Osmosis (RO)	15	2.3 Reducing Embedded Energy.....	36
ii. Nanofiltration.....	15	i. Infrastructure Upgrades.....	36
iii. Electrodialysis (ED)	16	ii. Leak Management	37
iv. Multistage-Flash Distillation (MSF)...	16	iii. In-Conduit Hydropower.....	37
v. Multiple-Effect Distillation (MED)	16	3. Conclusion.....	38
vi. Vapor Compression.....	16	Energy for Wastewater Treatment	38
vii. Membrane Distillation (MD) or Hybrid..	16	1. Wastewater Collection.....	40
3.2 Energy Costs and Efficiency.....	18	2. Wastewater Treatment.....	40
3.3 Energy Costs of Disposal	19	2.1 Wastewater Treatment Standards	40
4. Conclusion.....	20	2.2 Wastewater Treatment Plants	42
Energy for Water Conveyance.....	20	i. Publicly Owned Treatment	
1. Water Conveyance	21	Works (POTW).....	42
1.1 Large Water Transfers	22	ii. Privately Operated Wastewater	
1.2 Distribution Networks.....	23	Treatment Works.....	44
2. Policy	24	2.3 On-Site Sewage Facilities	45
3. Energy Savings Potential.....	26	2.4 Process Optimization.....	46
3.1 Pumps and Pipes.....	26	2.5 Energy Potential of Wastewater	
3.2 In-Conduit Hydroelectricity	26	Treatment Plants.....	46
3.3 Losses.....	27	2.6 Constructed Treatment Wetlands	48
4. Conclusion.....	27	3. Recycled Water	49
		3.1 Regulations and Policy	49
		i. Federal Level.....	49
		ii. State Level.....	50

3.2 Water Reuse in the U.S.....	51	2.2 Technology Approach	94
i. Non-Potable Reuse	52	i. Fossil Fuels (Coal, Natural Gas, Oil, Biomass)	95
ii. Potable Reuse	52	ii. Nuclear.....	95
3.3 Energy Intensity of Water Recycling	54	iii. Advanced Natural Gas Technologies....	95
i. Water Recycling Facilities.....	55	iv. Advanced Coal-Fired Facilities	98
ii. Engineered Natural Systems	57	v. Solar Thermal	98
3.4 Barriers to Water Recycling.....	57	vi. Geothermal.....	98
4. Water Discharge	58	2.3 Understanding Discrepancies	99
5. Conclusion.....	59	3. Environmental Impact	100
SECTION II. WATER FOR ENERGY.....	61	3.1. Freshwater Sources and Supplies.....	100
Introduction	61	3.2 Water Quality and Aquatic Life	102
Coal.....	61	4. Future Demand and Climate Change	103
1. Mining	63	5. Conclusion.....	103
2. Processing.....	65	Oil.....	104
3. Transportation	65	1. Drilling and Extraction.....	106
4. Conclusion.....	65	1.1 Conventional Oil.....	106
Natural Gas	68	1.2 Unconventional Oil.....	108
1. Extraction	71	i. Oil Sands	109
1.1 Conventional Natural Gas.....	71	ii. Oil Shale.....	110
1.2 Unconventional Natural Gas.....	72	1.3 Water Rights and Regulations	111
i. Shale and Tight Sand Gas	72	i. Water Rights	111
ii. Coal Bed Methane	75	ii. Regulations	112
2. Processing and Storage.....	77	2. Transportation.....	112
2.1 Liquefied Natural Gas.....	77	3. Processing, Refining and Storage	112
2.2 Gas-to-Liquids	77	4. Conclusion	113
2.3 Gas Storage	78	Transportation Biofuels	113
3. Transportation.....	78	1. Feedstock Production	116
4. Conclusion	79	1.1 Bioethanol.....	116
Uranium.....	80	i. Corn Ethanol	116
1. Mining	82	ii. Cellulosic Ethanol	117
2. Processing and Transportation.....	84	1.2 Biodiesel.....	117
3. Conclusion.....	85	2. Processing, Refining and Storage	118
Thermoelectric Generation.....	88	2.1 Ethanol.....	118
1. Cooling Technologies	89	i. Corn Ethanol	118
1.1 Once-Through (Open-Loop) Cooling.....	89	ii. Cellulosic Ethanol	118
1.2 Closed-Loop (Wet) Cooling	90	2.2 Biodiesel.....	118
1.3 Dry (Air) Cooling	91	3. Transportation.....	119
1.4. Hybrid Cooling.....	92	4. Life-Cycle Analyses and Water Balance	120
2. Water Use for Thermoelectric Generation.....	93	5. Conclusion.....	121
2.1 Survey Approach.....	93	REFERENCES	123

Section I – List of Figures

Figure 1. Water Flowchart (Highlighting Water Extraction and Conveyance)	10	Figure 18. Monthly Energy Consumption in 2010 by California Water Supplies.....	34
Figure 2. Electricity Consumption in 2010 by Major California Water Supplies.....	12	Figure 19. Water Flowchart (Highlighting Water Collection, Treatment and Discharge).....	39
Figure 3. Energy Intensity of Inland Empire Utility Agency and San Diego (Calif.) Water Supply Options..	14	Figure 20. Share of On-Site Wastewater Treatment for Households by State.....	41
Figure 4. U.S. Desalination Capacity by Source Water and Technology in 2005	15	Figure 21. Total Documented Needs for Wastewater Treatment in the U.S.	42
Figure 5. Simplified RO Scheme With Energy Recovery System	15	Figure 22. Typical Wastewater Treatment Process ...	43
Figure 6. ED Process Principle	16	Figure 23. Population Served by POTWs Nationwide Between 1940 and 2008 and Projected	43
Figure 7. Simple MSF Distillation Process Scheme ...	17	Figure 24. Electricity Requirements for Activated Sludge Systems	44
Figure 8. Multiple Effect Distillation Process	17	Figure 25. Septic System	45
Figure 9. Vapor Compression Process.....	18	Figure 26. Summary of Wastewater Solids Management in the U.S.	47
Figure 10. Brine Disposal Options for Desalination Plants in the U.S.	19	Figure 27. Facilities With Anaerobic Digestion and Digester Gas Utilization in the U.S.....	48
Figure 11. Water Flowchart (Highlighting Source)....	21	Figure 28. Unit Cost Information for Selected Resource Management Strategies	49
Figure 12. Emerging Water Stress and Projected Population Growth.....	22	Figure 29. Reclaimed Water Utilization in Florida and California	51
Figure 13. Energy Intensity of Water in Potatoes, Columbia River Basin	23	Figure 30. Planned Direct Potable Reuse (DPR) and Examples of Implementation.....	53
Figure 14. Energy Intensity of IEUA Water Supply Options	25	Figure 31. Planned Indirect Potable Reuse (IPR) and Examples of Implementation.....	54
Figure 15. Water Flowchart (Highlighting Water Treatment and Water Distribution).....	29	Figure 32. Energy Intensity of Water Supply Sources in Southern California	55
Figure 16. Typical Drinking Water Treatment Process ...	32		
Figure 17. Water Treatment Energy Intensity.....	32		

Section I – List of Tables

Table 1. Observed Energy Intensities for Different Supply Sources in California (kWh/MG)	11	Table 5. Unit Electricity Consumption for Wastewater Treatment by Size of Plant	45
Table 2. Salt Concentrations of Different Water Sources	14	Table 6. Energy Intensity of Recycled Water Treatment.....	56
Table 3. Water Sector Electricity Use in California in 2001, GWh	24	Table 7. End Use of Recycled Water and Minimum Treatment	57
Table 4. Electricity Consumption Projections for Water Supply	33		

Section II – List of Figures

Figure 1a. U.S. Coal Cycle.....	62	Figure 22. Estimated U.S. Water Flow in 2005: 410,000 MGD	85
Figure 1b. Coal Production by Region, 1970 to 2025....	62	Figure 23. Flow Chart of Embedded Water in Energy ...	89
Figure 2. Flow Chart of Coal and Embedded Water ...	63	Figure 24. Diagram of a Once-Through Cooling System	90
Figure 3. Mountaintop Mining.....	64	Figure 25. Diagram of a Closed-Loop Cooling System	91
Figure 4. Water Consumption Data for Coal.....	66	Figure 26. Diagram of a Dry Cooling System.....	92
Figure 5. Projected Water Consumption in Primary Energy Production.....	66	Figure 27. Diagram of a Hybrid Cooling System.....	93
